Micro Centrifuge Tubes

(0.5/1.7/2 ML Tubes)

Where perfection is the prerequisite, even the smallest components get the same importance.

Even though micro centrifuge tubes are considered widely as just another part of the device, they are extremely important in the way they affect the outcome of the experiment.

Thus, the highest standards are followed during the design & development of these tubes to ensure that there does not remain even the minutest chance of any flaws in this vital consumable.

As a result, these tubes high-quality are certified to be free from all affecting biological elements such as DNase, RNase, Endotoxin, Pyrogen and ATP.

Product Features

Perfection Is An Understatement

Experience the impact of perfection in your lab with impeccable microcentrifuge tubes which are designed using the absolute best raw materials and procedures to ensure almost 100% purity. Moreover, these tubes are built offer optimum convenience & durability.

Manufactured In Fully Automatic Human Touch-free Plant With Class 100k Clean Room Facility With Controlled Environment & Access

Produced From Swiss-made Diamond Finish Mold For Flawless 'Super Smooth' Internal Surface

Superior Engineering Technique Enables Tubes To Withstand Higher G Force Up To 20,000 RCF

Non Cytotoxic

Biologically Inert

Highly Transparent And Clear

US FDA Approved Virgin Polypropylene Without Any Trace Of Metals

Dnase, RNase, Endotoxin, Pyrogen Free

Perfection Is An Understatement

Can Withstand Temperature From -80 To +121° C

Easy Seal Design Of The Cap To Ensure Smooth Opening And Closing With Single Hand Repeatedly

Clear Large Graduations On The Body Of The Tube

Thin Cap Membrane For Trouble Free Needle Piercing

Flat & Frost Lid And Body For Easy Labeling

Fits All Standard And High Capacity Centrifuge Rotors
